

J&K Security Solutions Responds to Tavern Break-ins

Since early February, small bars in the Dane County area have been plagued by a string of burglaries.

In most situations, burglars target rural establishments in the early morning, cutting the phone lines and breaking into the bar to gain access to cash registers and gaming machines.

J&K Security Solutions has responded to this recent commotion by providing a security system complete with a cellular backup dialer that directly connects to the nearest police department in the case of the phone lines being cut.

In the most recent break-in on July 1 at Murphy's Tavern on East Washington, police caught the perpetrator not long after he smashed the windows in the bar and fled the scene with stolen cash. The J&K Security Solutions alarm system and cellular backup unit had been installed in this bar and alerted the police to the break-in early on.

Don't be one of the victims. You can protect your business and hardearned cash with J&K's superior alarm systems. Contact us at info@jksecurity.com today.
